

## **1P Series**

**These pumps are widely used as a source of hydraulic power in mobile & industrial application. They combine stable performance and robust construction with a wide range of delivery rates. Pump Type -3036, Geometric Displacement – 10.93 cu.cc/rev, Flow – 16.40 lpm, Maximum Working Pressure – 207 bar, Direction of Rotation – Clockwise, Shaft – Straight Keyed Shaft, Mounting – 2 – Bolt Front; Section & Delivery 4-bolt Flange, Performance with SAE 20W oil at 50 deg. Celsius.**
