

2P Series

These pumps are widely used as a source of hydraulic power in mobile & industrial application. They combine stable performance and robust construction with a wide range of delivery rates. GROUP 2P -3000 SERIES, Geometric Displacement – 44.33 cu.cc/rev, Flow – 66.50 lpm @ 1500 rpm, Maximum Working Pressure – 174 bar, Direction of Rotation – Clockwise, Anti-clockwise, Shaft – Straight Keyed Shaft, Mounting – 2 – Bolt Front; Section & Delivery 4-bolt Flange, Performance with SAE 20W oil at 50 deg. Celsius.
