

Air And Water Hose

They also have the capability of working with high and low operating temperatures and pressures. This makes them suitable for use in the most extreme environments. Air hoses provide a robust service for a wide range of markets. We offer a variety of constructions in multiple colours, pressures and sizes. Our air hoses, which includes both hydraulic and pneumatic air hose options, are designed for the transfer of air within a variety of industrial applications.

Core: Plasticized PVC, Black

Reinforcement: Single braid of Synthetic fibre

Cover: Abrasion resistant thermo-compound, black Colour

Application: Specially designed for Tyre inflation, light engineering industry and general-purpose airline.
