

Electric Actuator Operated Valves

Features :

- * **Torque:** 15 Nm to 4000 Nm
- * Made of Aluminium Alloy which can resist against heat, Acid, Alkali, Water proof, Dust proof.
- * Low Power Consumption, high efficiency and excellent weatherproof heavy-duty motor.
- * Stabilized start speed to effectively avoid water hammering to prolonged the service of life tubes.
- * Advanced design manual operation without any clutch to prevent user from injury.
- * All the joint on the housing are armed with waterproofing seal (IP67), which is appropriate for use in outdoor environment.
- * Continuous mechanism position indication.
- * Low noise level.
- * Built – in Thermal Protection which prevent motor burning out.
- * Auto declutch wheel type manual override. (Model: MOD – 2-1 & 3-1, to MOD -12). Key type Manual override (Model MOD-i, MOD-2, MOD-3)
