

## Double Vane Pump

### VT67BB

Model VT67BB hydraulic double pumps comes from Veljan hydraulics. The company is known for designing and manufacturing of hydraulic products and equipment, vane pumps. It is specialized in manufacturing hydraulic vane pumps. Technical specifications: Max pressure – 4000 psi, 270 bar. Maximum displacement – 1.32–12.20 in<sup>3</sup>/rev, 22-200 cm<sup>3</sup>/rev; and Max speed – 2650 rpm.

### VT67CB

Model VT67CB hydraulic double pumps comes from Veljan hydraulics. The company is known for designing and manufacturing of hydraulic products and equipment, vane pumps. It is specialized in manufacturing hydraulic vane pumps. Technical specifications' pressure – 4000 psi, 270 bar, Maximum displacement – 1.32–12.20 in<sup>3</sup>/rev, 22-200 cm<sup>3</sup>/rev; and Max speed – 2650 rpm.

### VT67DB

Model VT67DB hydraulic double pumps comes from Veljan hydraulics. The company is known for designing and manufacturing of hydraulic products and equipment, vane pumps. It is specialized in manufacturing hydraulic vane pumps. Technical specifications Max pressure – 4000 psi, 270 bar. Maximum displacement – 1.32–12.20 in<sup>3</sup>/rev, 22-200 cm<sup>3</sup>/rev; and Max speed – 2650 rpm.
