

Hydraulic Pressure Switch

Hydraulic Pressure Switch HO

Features:

- * Compact
- * Lightweight
- * Three mounting styles
- * Lockable protective cap to avoid tampering (optional)
- * Electrical rating: 5A, 250 VAC; 0.2 A, 250 VDC (res.)

Applications: Used in compressors, hydraulic power packs, manifolds/stacks with sandwich plates, high/low pressure alarms in CNC machines etc.

HO series pressure switches have a machined aluminium powder coated enclosure and are recommended for manifold mounting hydraulic applications. The repeat accuracy is better than ± 1 % FSR. A connector to DIN 43650 is provided for wiring.
