

Thermowells

W1 Thermowells Bar Stock (Screwed)

Special Features:

- * Design as per PTC 19.3
- * These Thermowells are manufactured from solid bar Stock and installed into the process with the help of threaded process
- * This design is suitable for all type Of R TO's, Thermocouples, mechanical as well as digital
- * Available in various Shapes like Straight. With reduced tip, partial taper & full taper

W2 Thermowells Bar Stock (Flanged)

Special Features:

- * Design as per PTC 19.3
- * These Thermowells are manufactured from bar Stock and into the process by using a flanged connection
- * This design is suitable all type Of RTD'S, Thermocouples, Mechanical as well as thermometers
- * Full penetration welded
- * Available in various shapes like Straight. Straight With reduced tip. partial taper & full taper
- * All type Of flanges and facings are available per ANSI \ DIN \ JIS & BS

Applications:

Chemical plants, Petrochemical plants, Engineering plants, On Shore, Off Shore and Other similar process industries.

W3 Thermowells Bar Stock (Sanitary)

Special Features:

- * Design as per PTC 19.3. These Thermowells are manufactured from solid bar Stock and installed into the process by using clamp connection
- * The smooth and polished surface of the wetted parts helps for Cleaning and prevents potential contamination of his design is Suitable for all type Of R T De, Thermocouples. as well as digital thermometers
- * Available in various shapes like Straight, Straight With reduced tip, partial taper & full taper.

Applications:

Biochemical plants, pharmaceutical plants, Food and beverage industries, Sterile process & other similar industries.
